# Discover a New Evolution Giant Step Forward in Stereo Microscopy

Traditional boundaries between scientific fields such as molecular biology and developmental biology are rapidly disappearing as researchers seek to connect findings at the molecular level to those derived from cellular, tissue, and organismal studies. Fields including molecular biology, cell biology, neurobiology, embryology, developmental biology and systems biology have increasing needs for imaging systems that span spatial scales from single cells to whole organisms.

With these demands in mind, Nikon has developed an all new stereo microscope that features a large zoom ratio of 25:1, high resolution and exceptional fluorescence transmission capability.

This latest edition to the SMZ series represents a landmark in stereo microscope evolution – one that guarantees your research will be elevated to the next level.

## World’s largest zoom range and highest resolution in the SMZ series

- First stereo microscope to offer a 25:1 zoom range (SMZ25)
- Both eye paths boast numerical apertures (NA) of up to 0.156, using the SHR (Super High Resolution) Plan Apo 1x objective and SMZ25 zooming body

## Bright and high contrast fluorescent images

- Fly eye lens ensures uniform brightness over the entire field of view even at the lowest magnifications
- Breakthroughs in optical design result in significantly improved signal to noise ratio and crystal clear fluorescent images

## Automation and digital imaging

- Motorized focus and zoom operation (SMZ25)
- Imaging Software NIS-Elements enables the use of multiple imaging, processing and analysis modalities including z-stack capture, time-lapse imaging, and the generation of EDF images

## Easy to use

- User-friendly remote control (SMZ25)
- Easy-to-operate slim LED DIA base with OCC illumination
- Wide range of illuminators and accessories accommodate a variety of observation methods

**SMZ25**  
Motorized zoom model  
with the highest zoom  
ratio and resolution  
in the SMZ series

**SMZ18**  
Manual zoom model  
providing advanced optical  
performance and incredibly  
bright fluorescence at an  
economical cost

	Motorized zoom	Manual zoom
Zooming observation	BF/DF/FL/Simple polarizing	BF/DF/FL/Simple polarizing
Zoom ratio	25:1	18:1
Magnification range	0.63x ~ 15.75x	0.75x ~ 13.5x
Maximum magnification	315x*1	270x*1
Maximum FOV	ø70mm*2	ø59mm*2
Maximum NA of objective	0.312*3	0.3*3

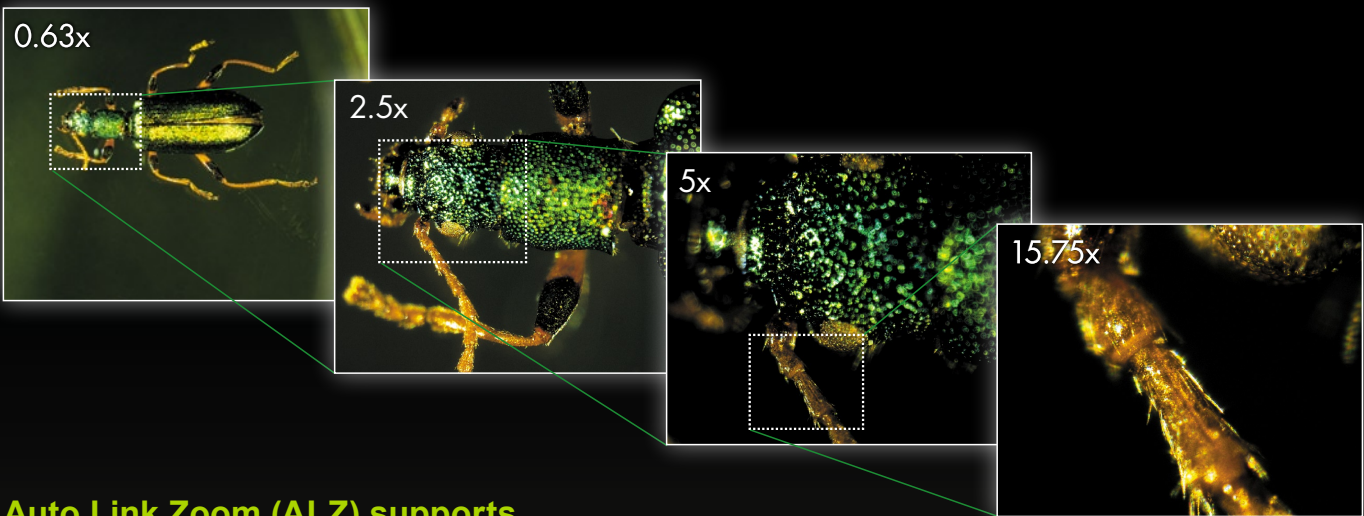

\*1: Using SHR Plan Apo 2x/C-W 10x   \*2: Using SHR Plan Apo 0.5x/C-W 10x   \*3: Using SHR Plan Apo 2x

# World's largest zoom range and incredible resolution

## Dynamic zoom ratio of 25:1 SMZ25

An innovative optical system known as Perfect Zoom System provides the world's first zoom ratio of 25:1 (zoom range: 0.63x - 15.75x). Even with a 1x objective lens, the SMZ25 captures the entire 35mm dish and simultaneously delivers microscopic details.

*Arthromacra* sp.  
(Using SHR Plan Apo 1x with SMZ25)  
Image courtesy of Japan Insect Association

## Auto Link Zoom (ALZ) supports seamless viewing at different scales SMZ25

ALZ automatically adjusts the zoom factor to maintain the same field of view when switching objective lenses. This function enables seamless switching between whole organism imaging at low magnifications and detailed imaging at high magnifications.

Maintains FOV at total magnification of 3x

Image courtesy of Hokuto Kazama, Ph.D. Laboratory for Circuit Mechanisms of Sensory Perception RIKEN

## Offers the highest zoom ratio thanks to Nikon's Perfect Zoom System SMZ25

A breakthrough in stereoscope design, Perfect Zoom System dynamically change the distance between the two optical axes as the zoom factor is changed. This change in optical axis distance enables maximization of light entry into the optical system at every magnification. The result is an uncompromised, large zoom range, high resolution in both eye paths, and minimal aberrations over the entire zoom-range. Furthermore, this breakthrough in optical design enables all of these desirable features to be housed in a compact zoom body, resulting in an ergonomic instrument design.

Higher NA in both eye paths coupled with a superior zoom ratio provides seamless viewing on the macro and micro levels.

## Superior resolution never before seen on a stereomicroscope

Nikon's SMZ25 series offers superior NA of 0.156 on the SHR Plan Apo 1x and 0.312 on the SHR Plan Apo 2x. Traditionally, researchers have had to switch to a higher magnification microscope to view microscopic details after using a stereo microscope to view or manipulate macroscopic structures. Nikon's SMZ25/18 eliminates this need by providing both macroscopic and microscopic imaging capabilities. For example, the SHR Plan Apo 2x objective allows for visualization of structures as small as a few microns in size, which was once considered to be impossible on a stereo microscope. Apochromatic correction is maintained in both the objective lens and the optical zoom system, virtually eliminating color aberrations.

Individual olfactory nerve cells in a *Drosophila* expressing a GFP-membrane marker are clearly resolved as black bodies encircled by fluorescent membranes (see circled area). This image demonstrates the SMZ25's incredible high resolution as the olfactory cells are typically only 5µm in diameter

## Newly developed high-performance objective lens SMZ25 SMZ18

Nikon's newly developed objective lens series, the SHR Plan Apo series, offers a high resolution of 1100LP/mm (Observed value, using SHR Plan Apo 2x at maximum zoom). The new SHR Plan Apo series of lenses deliver brilliant images with true-to-life colors.

● Comparison of resolution by resolution chart

# Bright and high contrast fluorescent images

## Enhanced brightness and uniform illumination in low magnification range

Even at low magnification, the SMZ25 series captures the entire 35mm dish with equal brightness over the whole field of view\*, making these new stereo microscopes ideal for live screening of developmental models such as *C. elegans*, drosophila, zebrafish, and mice to identify and select mutants. The SMZ25 series also allows brilliant images to be captured even with low excitation light levels, minimizing photo-bleaching and photo-toxicity which is harmful to live cells and organisms. \*Using SMZ25/SHR Plan Apo 1x

Time-lapse imaging of developing *C. elegans* embryos expressing RFP-histones and GFP-membrane markers allows researchers to screen for cytokinesis mutants prior to selection for downstream applications

Center for Genetic Analysis of Biological Responses, Research Institute for Microbial Diseases, Osaka University

## Fly eye lens ensures uniform brightness over the entire field of view

The SMZ25 series is the first stereo microscope in the world to use a fly eye lens on an epi-fluorescence attachment. This innovative design ensures bright and uniform illumination even at low magnifications, resulting in uncompromised uniformity in brightness across a large field of view.

Newly developed epi-fluorescence attachment captures clear fluorescence images.

## Improved S/N ratio and crystal clear fluorescent images thanks to an improved optical system

Nikon's newly developed optical system offers a drastic improvement in S/N ratio even at high magnifications. This improved S/N ratio makes it possible to capture cell division, which is difficult using conventional stereo microscopes, and samples with low excitation light.

The spindle appearing in cell division can be observed

## Zoom body with significant improvements in optical performance

Nikon has succeeded in improving the signal and reducing noise in fluorescent images by using a short wavelength, high transmission Fluor lens. Combined with an innovative epi-fluorescence attachment, the SMZ18/25 is better able to detect excitation light than conventional fluorescent stereo microscopes.

# Automation and digital imaging

A wide range of digital imaging capabilities with the Digital Sight series and NIS-Elements imaging software.

## User-friendly remote controller SMZ25

The all new remote controller provides easy access to zoom and focus controls and is designed for both right and left hand use. The remote controller contains an LCD monitor with an adjustable backlight which provides information regarding the zoom factor, objective lens, filter cube, and LED DIA brightness at a glance. The backlight on the LCD monitor can also be turned off to eliminate interference with low-light imaging applications. In addition to the remote controller, the microscope can also be operated through a PC.

## Access the information you want quickly and easily SMZ25 SMZ18

Easily obtain the information you need, such as Z drive position, zoom factor, objective lens, filter cube, and LED DIA brightness by using the Digital Sight series and NIS-Elements or Digital Sight series DS-L3 together with the microscope.

## On-axis imaging for digital images

Easily switch between stereo position (stereoscopic view) and mono position (on-axis view) when using the P2-RNi2 Intelligent Nosepiece by simply sliding the objective lens. Digital images with uncompromised clarity can be captured using the mono position.

## Imaging Software NIS-Elements

One software for all systems: NIS-Elements which is Nikon's flagship, cross-platform imaging software can now be used with Nikon's latest stereomicroscope systems SMZ25 and SMZ18. NIS-Elements enables a wide range of advanced digital imaging capabilities, easily from a PC.

### Multichannel (multicolor)

Multiple fluorescent channels can be captured in conjunction with other imaging methods such as OCC or brightfield.

Individual cells resolved in a live drosophila embryo expressing GFP and mCherry (using SHR Plan Apo 2x at zoom magnification of 8x with SMZ25)  
Image courtesy of Max V. Staller, Ph.D., Clarissa Scholes, and Angela DePace, Ph.D., Harvard Medical School

### Time lapse

Easily setup a time-lapse imaging experiment with NIS-Elements.

### Extended depth of focus (EDF)

Capture multiple high resolution images at different focal depths to create a single extended depth of focus image or quasi-3D image.

## Digital Sight Series DS-L3

DS-L3 is an easy-to-use high-definition, large touch-panel monitor that can be used to quickly capture images without a PC or monitor.

### Scale tracking

The scale bar automatically adjusts to accommodate changes in magnification.

### Scene mode

Optimal imaging parameters for each sample type and observation method can easily be set using the icons.

## Select the perfect camera for your application.

Ultra high-definition cooled color camera head

Wide range of available accessories

Base unit

Nikon has improved ease of use by moving the controls to the front of the base, including the brightness adjustment dial and on/off switch.

Fiber DIA base

Fiber DIA base features condenser lenses that can be switched between low and high magnifications. Furthermore, the Oblique Coherent Contrast (OCC) illumination system allows high contrast illumination.

1 P2-DBF Fiber Diascopic Illumination Base

Slim bases

The slimmer LED DIA Base and Plain Base help increase efficiency of sample manipulation by bringing the level of the sample closer to the table.

2 P2-DBL LED Diascopic Illumination Base

3 P2-PB Plain Base

Conventional base

Slim base

Example applications

OCC illuminator

The new LED DIA Base with a built-in OCC illuminator generates minimal heat, consumes little power and is long-life. This illuminator can enhance the contrast of uneven surfaces, such as that of an embryo.

Microscope-Stage Automatic Thermo Control System  
Thermo plate MATS  
(Manufacturer: Tokai Hit Co., Ltd.)

The flat plate surface ensures easy operation of the manipulator and easy handling of specimens.

What is OCC illumination?

The acronym OCC stands for oblique coherent contrast (OCC), which is a form of oblique lighting method developed by Nikon. Compared to conventional diascope illumination that illuminates directly from below, OCC illumination applies coherent light to samples in a diagonal direction, giving contrast to colorless and transparent sample structures.

Conventional diascope illumination

OCC illuminator

Focus unit

The focus unit is combined with the base unit. Choose from either a manual or motorized focus unit.

1 P2-MFU Motorized Focus Unit

2 P2-FU Focus Unit

Stand / Focus mount SMZ18

Combine the stand with a focus mount for viewing and capturing images with reflected illumination.

1 P2-FMDN Focus Mount  
2 P-PS32 Plain Stand

SHR Plan Apo series of Objective

The SHR Plan Apo series features higher NA, wider field of view, and superior flatness and color aberration correction. These objective lenses can be seamlessly switched because all magnifications have the same parfocal distance. The new bayonet mount design allows lenses to be safely and easily removed.

1 P2-SHR Plan Apo 0.5x  
2 P2-SHR Plan Apo 1x  
3 P2-SHR Plan Apo 1.6x  
4 P2-SHR Plan Apo 2x

		SHR Plan Apo 0.5x	SHR Plan Apo 1x	SHR Plan Apo 1.6x	SHR Plan Apo 2x
Maximum NA	SMZ25	0.078	0.156	0.25	0.321
	SMZ18	0.075	0.15	0.24	0.3
Working distance		71mm	60mm	30mm	20mm
Correction ring		—	—	—	3mm water depth
Wavelength		380-700nm			

Tubes

Choose from two types of tilting trinocular tube and one type of low eyelevel trinocular tube. All tubes have a camera port for seamless integration with the Digital Sight series.

1 P2-TERG100 Trinocular Tilting Tube (eyepiece: port 100:0 / 0:100)  
2 P2-TERG50 Trinocular Tilting Tube (eyepiece: port 100:0/50:50)  
3 P2-TL100 Trinocular Tube L (eyepiece: port 100:0 / 0:100)

Nosepiece / Focus mount adapter

There is the option of the nosepiece either single or double for purposes of expanding research for changing the magnification range.

1 P2-RNI2 Intelligent Nosepiece  
2 P2-FM Focus Mount Adapter

Stage

The stage features an XY stroke of 6x4\* inches (150mm x 100mm) and can be attached to any of the bases, making it effective for capturing large images when used in combination with the imaging software NIS-Elements. A sliding stage and tilting stage are also available.

\*Limited Y travel with 32mm column bases

P-SXY64 XY Stage

Controller

Nikon offers a remote control unit that can be used to operate the microscope and capture images by hand. A footswitch is also offered, allowing the user to operate the microscope and capture images by foot, freeing the hands for sample manipulation.

P2-RC Remote Controller

1 AZ-PCR Photo Release  
2 AZ-FSW Foot Switch

Wide range of available accessories

Epi-fluorescence light set

Motorized epi-fluorescence light set

The fluorescent turret can be operated using the remote control or imaging software NIS-Elements.

- 1 P2-EFLM Motorized Epi Fluorescence Attachment
- 2 Light shading Plate (comes with Fluorescence Attachment)
- 3 P2-EFL Filter Cube (GFP-B/GFP-L/RFP)
- 4 P2-EFLBF Filter Cube (Bright Field, with  $\lambda/4$  plate)
- 5 P2-CTLA Control Box
- 6 P2-RC Remote Controller

Combinations with SMZ25

Manual epi-fluorescence light set

An easy-to-use manual model for Nikon's newly developed high-performance epi-fluorescence attachment.

- 1 P2-EFLI Epi Fluorescence Attachment
- 2 Light shading Plate (comes with Fluorescence Attachment)
- 3 P2-EFL Filter Cube (GFP-B/GFP-L/RFP)
- 4 P2-EFLBF Filter Cube (Bright Field, with  $\lambda/4$  plate)
- 5 P2-CTLB Control Box

Combinations with SMZ18

Fiber illuminator set

Flexible double arm fiber illumination set

The direction and angle of illumination can be changed to suit the sample by making adjustments with these double arms. The fiber holder position can also be changed to obtain the optimal position for illuminating samples.

- 1 C-FDF Flexible Double Arm Fiber Illumination Unit
- 2 C-FIDH Fiber Holder
- 3 C-FLED2 LED Light Source for Fiber Illuminator

Combinations with SMZ18

Ring fiber illumination set

This ring fiber illumination set features an episcopic illumination unit that effectively captures images (can be used with 1x and 0.5x objective lenses).

- 1 P2-FIR Ring Fiber Illumination Unit
- 2 C-FLED2 LED Light Source for Fiber Illuminator

Combinations with SMZ18

Coaxial illuminator

The coaxial light illuminator makes it possible to view light reflected from the surface of a sample, which is ideal for shooting shadow-less images of thick samples.

- 1 P2-CI Coaxial Epi Illuminator
- 2 C-FLED2 LED Light Source for Fiber Illuminator

Combinations with SMZ18

Ring LED illuminator

Ring LED illuminator is equipped with high-intensity and long-life LEDs. The illuminator's dial adjusts the intensity of the white LED.

- 1 P2-FIRL LED Ring Illumination Unit

Combinations with SMZ18

Darkfield observation accessory

Darkfield viewing is possible simply by attaching the dark field unit to the base.

- 1 P-DF LED Dark Field Unit
- 2 Shading cover

Polarizing observation accessory

The analyzer is attached to the objective and the polarizer to the base or stand to enable polarized viewing.

- 1 P2-POL Simple Polarizing Attachment

Specifications

	SMZ25	SMZ18
Zooming Body		
Optical system	Parallel-optics type (zooming type), apochromatic optical system	
Zoom	Motorized	Manual
Zoom ratio	25:1	18:1
Zoom range	0.63-15.75x	0.75-13.5x
Aperture diaphragm	Zooming body built-in	Zooming body built-in
